Office of Safety and Mission Assurance

Formal Methods Specification and Analysis Guidebook for the Verification of Software and Computer Systems

Volume II: A Practitioner's Companion

May, 1997

Approvals:

Task Lead

John C. Kelly, Ph.D.
Jet Propulsion Laboratory
Pasadena, CA

Concurrence for Publication

Kathryn Kemp
NASA OSMA Software Program, Manager
NASA IV&V Facility
Fairmont, WV

This guidebook is one of the products of a cooperative study to investigate the applicability of Formal Methods and Analytical Verification for critical NASA software systems. This guidebook was jointly developed through cooperative work from three NASA centers: Jet Propulsion Laboratory, Johnson Space Center, and Langley Research Center.
